To Whom It May Concern:

Re: Whitewater Concrete Ltd.

Please accept this letter of reference for Whitewater Concrete Ltd. They performed the concrete formwork to the Conference Centre addition and concrete seismic upgrade to the hotel suites at the Bayshore Hotel project in the fall of 1999.

Whitewater performed their work diligently and met or exceeded all schedule dates, while maintaining quality control. The schedule for this work was very compressed and Whitewater worked whatever hours necessary to ensure that all other trades were able to perform. Due to Whitewater's exceptional efforts, the seismic upgrade was completed two months ahead of schedule. They managed changes and clarifications very well, and we found that their layout was accurate, particularly embed and anchor bolt layout. They coordinated with other trades whenever required.

Intertech staff found both Kyle and Craig to be sincere individuals who performed their work in a professional manner. They staffed the project adequately at all times and responded immediately to extras and changes. We had no problems with them or any of their employees regarding safety matters throughout the project.

We would highly recommend Whitewater to you in any capacity you may consider them.
